When purchasing online with anyone even if its 5-10 dollars, scammers won't be able to keep your funds when you send them a payment. Meaning, they have to deliver the goods/services first before you release the funds. Escrow service with BTC. FEE \$2.25/Transaction/Transfer.

Reason 2

Scammer cannot use GluPay Escrow service, pay for the service/product then cancel the escrow. GluPay will automatically will pay the buyer/receiver the funds directly without any questions. So scammer cannot steal your service/goods/products.

Reason 3

When you offer any seller/buyer to be paid via GluPay BTC escrow, if they have the product/service they offer, will proceed and accept your escrow offer. Because its 100% guaranteed they will be paid if their advertised goods/products/services are legit. If not... you will request to cancel the escrow and keep your money.. they will just be wasting your time... "Scammers..... don't waste time, they want easy money, so they will run"

Reason 4

When you purchase/order any good/products/services 99% of the time scammers advertise they have it. Upon when you PAY them, they disappear, ignore you, give some funny reasons. But with GluPay Escrow, if they don't give you what u paid for... you will keep your money 100%.
