

Introduction

Thank you for purchasing this Ebook, you have made a wise decision. Let me start by giving you a brief overview of the method, and what you can achieve from this.

Basically, your going to be using ManyCam, and a Webcam Girl video on Repeat. You are going to broadcast this to 1,000's of people on Xhamster and various other sites that you choose, whilst telling the entire Room to Email you for Free Pictures, Free Videos or a Free Private Show.

There will be an auto-responder/vacation message setup, So that it directs everyone that emails you to a Free Webcam site, where you get \$1 Per Free Signup [Doesn't even require them to input their email]

And that's about it. You can just leave your Room broadcasting 24/7, And keep raking in the Profits from all the free registrations.

5. Go to Tinyurl.com and Create a URL for your Chaturbate affiliate Link .

E.g Tinyurl.com/freewebcamporn

6. Go to bit.ly and Shorten that TinyURL Link.

So now you will end up with a bit.ly link that goes to Tiny Url, That then goes to your affiliate link on chaturbate.

BIT.LY > TINYURL > CHATURBATE

The reason we do this, it that it masks the referrer, so chaturbate can't give us a reason not to pay [e.g Promoting on other cam sites or whatever]

Add this Link in your vacation responder, and were done for this stage 😊

XHamster

1. Signup for Xhamster if you haven't already.

The screenshot shows the registration form for Xhamster. The fields are filled with the following information: Username: sexysophie1993; Email: [redacted]@gmail.com; Password: [redacted]; I am: Male; Country: United States; State: New York; City: New York. A Captcha challenge is displayed with the words 'messuu' and 'accounts'. The Captcha input field contains 'messuu accounts'. Below the Captcha is a checkbox for 'I certify that I'm over 18 and I agree to the Terms of Use'. A red 'Sign Up' button is at the bottom.

2. Go to [Start Broadcasting](#) and Pick 'Girl' as your channel, and Allow Many cam as a source for your photo.

The screenshot shows the 'My photo' section of the Xhamster interface. The 'I'm / We're' dropdown menu is set to 'Girl'. A large grey area labeled 'My photo:' contains a video player. An 'Adobe Flash Player Settings' dialog box is open, titled 'Camera and Microphone Access', with the text: 'static.xhamster.com is requesting access to your camera and microphone. If you click Allow, you may be recorded.' The dialog has 'Allow' and 'Deny' buttons. Below the video player is a 'Take Snapshot' button. A red button is partially visible at the bottom.

Step 3. Take the snapshot, and Click Start Broadcasting.

4. Change the Room Title like below.

Obviously changing the email to your Gmail you setup.

5. Watch the Room Fill up, and Keep updating the Title, So it displays in the Room again. After an hour of this, you should have at least \$100.

And its as easy as that.

Sometimes your Room Will be Banned as people will call you fake and report you, So you basically just need to Re-sign up on Xhamster when this happens, and keep the money flowing.

I hope you enjoyed this Guide, And feel free to hit me up with any questions over on Hackforums.
