

# Extreme Bots V1

You will need a fud (Fully Undetectable Rat)rat.You can gain a fud rat from crypting it with a crypter from Hack Forums for example you have Datascrambler and much others.And if you need a rat I would recommend dark comet which is a free one that can be recieved by searching for the link on Hack forums Link to Dark comet:<http://www.hackforums.net/showthread.php?tid=2632776> And buyable crypters can be found here:<http://www.hackforums.net/forumdisplay.php?fid=299> If you don't want to pay for a crypter you might be able to find a generous person out there who can give you a free crypt,I will not be providing a crypt because that isn't what I am providing in this E-Book.

## Step number 1

Step 1) <http://www.Freelancer.com>

Head over to Freelancer.com and proceed to click hire.

## Step Number 2

Head over to

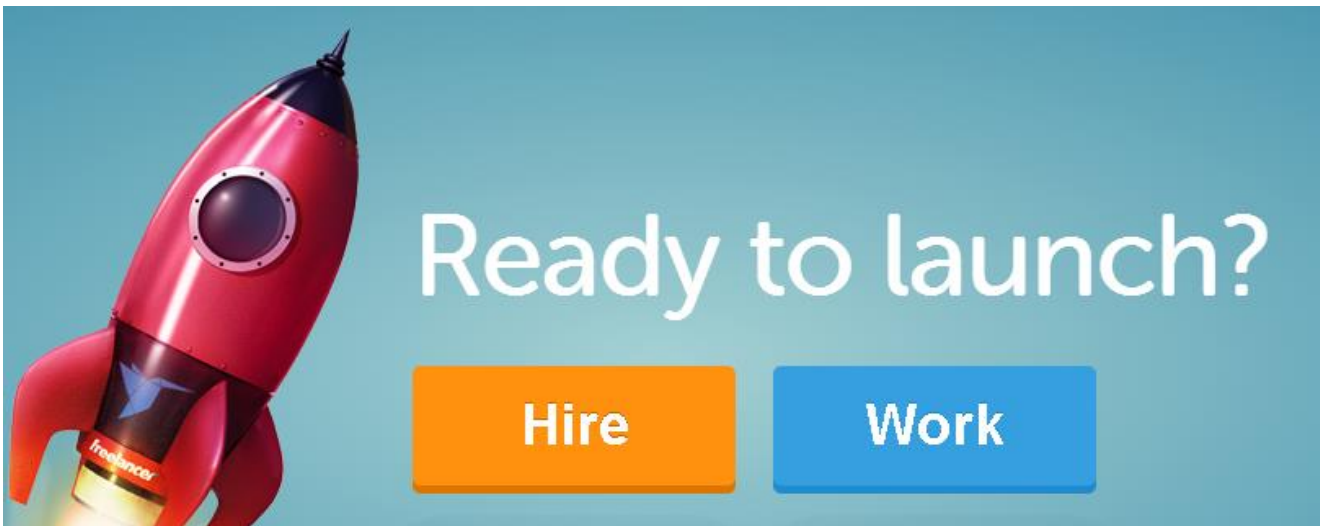

<http://>

[www.Freelancer](http://www.Freelancer)

[.com](http://www.Freelancer.com) and

proceed to click

hire.

step number 3 after you do that you want to pick a category Pick a category. For example: use Website's IT & Software

Step 4) Pick a sub category. For example: pick Write Some Software

**Step 5) Create an account, you**

# will want to use a REAL email account, so you are able to verify your email address.
