

GOLD BANKER

\$100 A DAY METHOD TO BANK WITH GOLD!

DO NOT COPY

Introduction

With this eBook you will learn how to make over \$100 a day online from the comfort of your home. I know how a lot of Internet Guru's claim that you can earn thousands by not even lifting a finger and it will come to you as easy as clicking a button. With this method I am not going to sugar coat it and I am going to tell you the absolute truth. You can build an amazing automated income but it will take time. Do not expect it to come overnight. However if you try your hardest and do not give up when the going gets tough you can expect to see some earnings come through on the first or second day.

Method

For this method we will be using a site called BitGold. When you sign up for this site you get around \$9-10 dollars and this is great for us because we can take advantage of this promotion. Do not worry through as this is completely white hat.

Name <small>i</small>	Location <small>i</small>	Custodian <small>i</small>	Today's Change <small>i</small>	Balance <small>i</small>
Toronto	🇨🇦 Toronto	BRINKS	+0.250g Gold	0.250g Gold
Total Vault Value <small>i</small>			+\$9.23	\$9.23

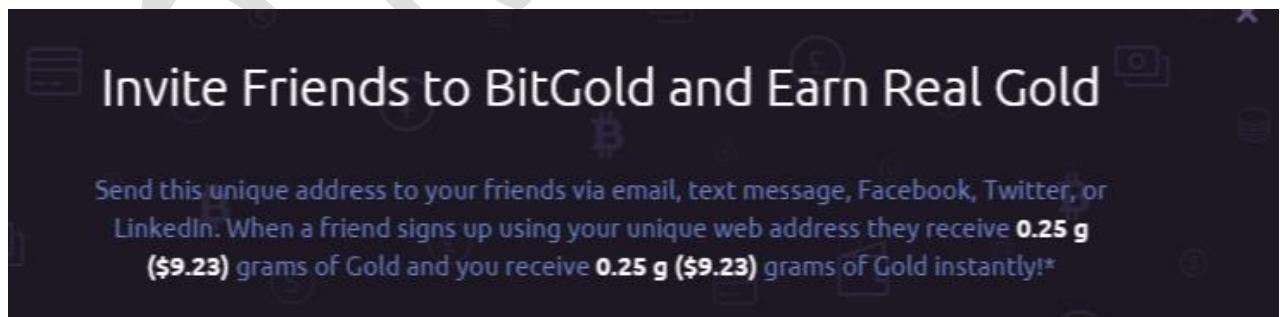

You are going to need to create a few email aliases off your main email for this method. Around 10 will do to start off with and one of those will be needed for the main BitGold account. You will also need the TOR Browser.

<https://www.torproject.org/projects/torbrowser.html.en>

First things first you will need to create a main account with BitGold - bit.ly/1h0iUml

Register your account under this link and verify your email and phone number and you will receive the bonus of \$9 in your account.

Then once you have done this go over to the invite friends tab which should be in the top right hand corner of the webpage and copy your referral link down into notepad – you will need for later.

Then go onto TOR and create an account under your referral link. Your main account should receive another \$9 same as the account you just created. For each new account you create under your main account's referral link use a different identity on TOR. After you have used all 10 different email aliases you created at the start you should have over \$100 in your main BitGold account.

You can keep making new emails and doing this or you can share your referral link on different money making sites like HackForums , LeakForums , Warrior Forums and BlackHatWorld. You could post to reddit or money coupon forums as well. Share your link round anywhere you can like your signature on forums. Make an eBook about it like I have done. There are so many different ways you can earn with this.

If you do these steps then you will be on your way to a good steady income.
