**What iOffer does is to sell cheap duplicates of famous
brands worldwide. Once you find out a pair that's around**

\$15-\$20 talk to the seller and tell him you need the item shipped to a specific address. Do this before you purchase the item, or he'll most likely ship it to your PayPal address. So, give the address of your buyer to your iOffer dealer and make sure he gives you a tracking number.

Now, the easiest part of all... Go to the item that you've sold, and insert the tracking number you've been provided with to be able to collect your money. Make sure you received and update the tracking information on eBay as it makes your funds become available sooner.

Congratulations! You have completed Mola and made your first sale, and most likely the feedback will be nice after the buyer gets the item shipped.

Tips from Stach

Make sure your iOffer seller provides you a tracking number, or you'll be throwing money away.

**Make sure the headphones you sell match the image on
eBay.**

**Be careful and don't over do it, I would suggest selling
around 2-3 pairs a week. That's \$600 a week!**

Have fun and best of luck!
