## Glossary:

- PP – Paypal
- MB – MoneyBookers (Skrill)
- AP – AlertPay (Payza)
- BTC – BitCoin
- WU – Western Union
- LTC – Litecoin
- DGC – Dogecoin
- PM – Perfect Money
- WMZ – Webmoney

# Overview

In this method, we are going to play the exchange role. As you would have seen, in HF exchange section, there are plenty of users running services around exchanging:

- PP to Skrill
- Skrill to PP
- PP to BTC
- WU to PP etc.

Here, I will give you your path to be one of them and make a lot of profit for nothing. I will show you the way where you can get your money exchanged at lowest rate and then you can earn profit by selling it at a profitable rate so you earn money acting as a middleman. After all, time is money and you need money to make money!

# Method

First of all, you need some initial funds to get started and begin exchanging

Head over to:

[ExchangeMoneyForum](#)

Register a new account which should be self-explanatory. Use all legit information.

Now you will have an account on forum. This forum is specifically built for currency exchange discussion and services.

Now, head over to

[EMF Currency Exchange Section](#)

Here you can see a lot of sellers which offer currency exchange between many payment systems like PP, Neteller, Skrill, webmoney, BTC etc.

The main advantage of this forum is people are selling or exchanging various currencies at very low rates. Few people sell at 2-5% rates. Sometimes, you may even get 1:1 deals!

See, here you can make a lot of profit! Just put bids on such offers which have low or 1:1 rates. And get your PayPal or any other funds exchanged to rare funds or target funds.

For example, I have a lot of Skrill funds. So now what?

Now you just go to HF currency exchange section (or any forum currency exchange section) and sell you Skrill. Go to:

HF Currency Exchange Section

Make your own shop that you are selling Skrill or any currency which is currently in demand, or even, find a thread matching what you need/have. Most of the sellers currently give 10% to 20% rate for exchanging their currency to PayPal/target currency. I.e. people come to exchangers and exchange their PayPal funds e.g. 120\$ to target Funds for 100\$ (20% rate)

So you see your opportunity here. Just purchase target currency from EMF at low rate or even 1:1 (0%) rate and sell it at higher rate in forums. You can even charge cheaper than other exchangers like you can keep rate of 15-20% and earn really large sum for nothing daily.

There are lots and lots of users need their PP or any other currency exchanged, daily.
