Method One

Affiliate Marketing is quickly becoming the most popular and profitable online money making method today. Through method one I will be showing you the **easiest** method to make above \$4,000+ a month! This eBook will contain absolutely **NO** fluff or false claims. I am not here to waste your time or mine. You will not have to make a website for this method.

Let's get started!

First, I will explain to you the basics of affiliate marketing and what it is. If you already know about affiliate marketing you can skip this part and head on to the next. Affiliate marketing is when the makers of a product pay you to sell/promote their product and you get a cut of the money! A "network" is what brings the vendors and the affiliate (you) together.

What You Will Need

The first thing you will need is a network. Finding a good one is an important step to becoming successful affiliate marketer. I have a couple networks that i have personally used and are extremely safe.

[Clickbank](#): Easily the most popular affiliate network out there. They have an endless number of products to chose from. You can get paid by check or bank transfer.

[SellHealth](#): This is one of the most trustworthy networks that provide great support. Make up to \$300 per sale. You can get paid by check or bank transfer. Also, you get paid bi-weekly on the 10th and 25th of each month

[Paydotcom](#): This website is very popular for their wide range of products and their ability to pay their affiliates through PayPal. This is one of the few networks that allow PayPal.

Tip: Do not enter fake information as this might affect your ability to be paid!
So be sure to enter real information.

The second thing you will be needing is a YouTube account, these are pretty easy to make and can be made in under a minute. You will need to also have a Gmail account and might need a Google+ account.

Starting The Method

After you've signing up for a network, comes the most important step, choosing the right product. This could be your make or break on making money.

You will want to find a product with high gravity. A good place to find Clickbank products is this website:

A good way to find the best product to promote is seeing how much traffic it gets on a regular basis. First, find a product you like and type it into these websites..

You will need a Google account. Once you've signed up type in your product under the "Search for new keyword and ad group ideas" tab here.

<http://adwords.google.com/ko/KeywordPlanner/Home>

What would you like to do?

▶ Search for new keyword and ad group ideas

After you've searched, click on the "Keyword Ideas" tab.

Look at how many monthly searches your product gets. 10,000+ searches is a good amount. However, you don't want something that has too much competition. Aim for a product that gets under 200,000 searches a month.

If you want to be even more precise, you could repeat the same steps using the YouTube keyword tool.

Applying The Method

Step one

So the first thing in applying the method is uploading a video about the product you've chosen, you need to make sure you find the right video. However, for maximum profits, make your own video and try making it appealing as possible. One very important thing you should not forget is using a microphone in your video, I cannot stress how important using a microphone is.

So if you've decided to copy someone else's video, you will want to search your product's review on YouTube. Find a video with HD and nice quality. The video you choose will be the one you make your money with, so be sure you are satisfied with it before proceeding.

Once you've downloaded your video you will need to upload it to youtube. You can find many YouTube downloaders on the internet but this one is the most popular of them all.

<http://keepvid.com>

Be sure to download at least 480p.

However with this step, youtube might detect your video as a copied video, since youtube has special protection called "spam filter". You will want to bypass this by editing the video to make it a bit different, there is many video editors, one of the most popular is Movie Maker which you can download [HERE](#) if you don't already have it.

Step two

Now comes one of the most important steps in this method which is boosting your views. You can't just upload a video with no audience and expect it to gain views. There are several major factors to getting your video "ranked" within the system

The main contributors to ranking YouTube videos are:

1. High retention views (80% - 100% watch time)
2. Likes
3. Channel Authority (Subscribers)
4. Description/Tags

Here you have 2 options, either to invest or to not. If you invest, this will speed up the process tremendously. You can buy retention views from a distributor. The more you spend the more money you will bank. A small 5\$ investment could be your first step to making hundreds.

However if you would rather not to invest, you can use social exchanging websites such as <http://www.enhanceviews.com>

If you will invest, here are some recommended places to buy views from:

HackForums

Fiverr

YTNuke

BlackHatWorld

Now for the description. You want your description to be at least of 200 words and not more than 400 words. I simply go to my products website and copy down what they wrote about their product. make sure that you include your products keyword in the first and last sentence. Now with tags, you want around 5 of them. Enter phrases like "your product review" or "your product results". Just write down anything that comes to mind. Make sure to put your affiliate link in the description to earn money.

That's it for method one, now if you want to bring in more hundreds repeat it with other products. Now all you have to do is sit back and **relax** and let the money roll in.

Do not forget to make more videos, if you do that, you'll be on your road to making at least \$4,000 a month! The more videos you post the more money you'd expect.

Thank you for purchasing MoneySpawner.

I wish you good luck on your money making journey!
