

# PICTURE MONEY

Hi guys! Before i start with the whole e-book and stuff. I want to say thank you for buying this super awesome e-book that's going to make you \$\$\$.

First off I wanna tell you guys that this way, if you do it legit, can make you loads of cash without getting banned / suspended on any website. It's just a cool way to earn money I used to do a lot.

So basically what you're going to do is .....

## SELLING STOCK PHOTO'S!

If you don't know what stock photos are, they are pictures you can buy to use on your own websites, designs etc. So what we are going to do is 2 things.

- 1 = Making some badass pictures and sell them ( I did this and earned at least 300\$ a month autopilot if you just upload 100 pictures you will get autopilot \$\$\$ )
- 2 = Using some not famous pictures from the internet and sell those! ( non copyrighted pictures ) ( I do not recommend it because it can get you banned if you don't do it right )

Oke I'm going to tell you how the two method works and how you can earn autopilot money with it. If you don't know how you can earn autopilot money with it here is a little explanation:

You are going to post a lot of pictures, maybe like 20-30 or if you want hundreds. Then when people search the picture on google / stock website then they will see your picture and buy it. More you don't need to do. I will give you some extra tips and tricks in this tutorial to get you started and getting some good money !

So we have 2 methods as I said. To use those method first we need an account to stock websites. Remember: more stock photo websites = more \$\$\$

Oke how do we get an account? Well.. its easy.

Here is a tutorial on how to use the website iStockphotos.com , you don't need to use this website as they are hundreds of other website you can use! ( at the end of the ebook you'll see 3 extra bonus websites that means if you have 4 websites with all your pictures you will get more and more costumers! )

1. First click on Register
2. Fill in your information ( real info! ) like email address etc.
3. Now when they ask tell us about yourself you're going to choose **I'm signing up to become an iStock contributor**
4. Click continue
5. Go to this page <http://www.istockphoto.com/sell-stock-photos.php>
6. Now you will see Apply to be a contributor, you can see 4 things : Photo's, Illustrations, Videos and Audio.
7. We are going to use photo's, but you can always choose something else! Maybe you have some master video editing skills or maybe some sick drawing skills! You can sell it all.
8. Now you'll see a very big tutorial, you can click on continue all the time and read trough it but if you don't have the time or your just being lazy just go to this link: <http://www.istockphoto.com/help/sell-stock/training-manuals/photography/prohibited-uses>
9. Now click on Continue to application
10. Now you need to fill in your (real) Info for a private account. Just fill it in
11. As last choose the apply for contributor and then click save
12. Now we will see a long quiz, if you read it all you can just answer the questions if you didn't read it or just don't know the answer even though you read it you can go to the last page of this e-book to see the answers.
13. Now if you passed the quiz you're last thing is to fill in the last information
14. When you've done that you need to show 3 samples so make some nice pictures of your room or maybe of your cat or dog. Save them and send them to them. If you use the risky way to get some pictures from the internet, you can always try it, it worked for me but I don't know if I was lucky or its just easy.
15. If you made the right pictures your application should be accepted and you are able to earn \$\$\$
16. Oke do all these steps but then on other sites, why? Because if you have like 5 websites where all your pictures are stored you'll get more costumers and the most nice thing of it is, you don't have to do anything more. Just upload quality pictures and then do nothing, you can upload every week, every day or every month. But you can also just upload today and then never again.

Well..... That's basically how you earn money!

The nice thing about this is, its legal and you can earn some nice money from it.

I started with some basic pictures and posted some of them and then I just didn't give a f\*\*\*. But then at the end of the month I received a payment and earned some nice 30\$ for just posting 4 pictures! If you just make some badass pictures with your camera or phone you'll be making some real \$\$!

- 1. Files downloaded from iStockphoto (including yours once you pass this test) are offered with a royalty-free license, which describes how the image can and cannot be used: - TRUE**  
When iStock clients download an image they must first agree to our royalty-free content license agreement.
- 2. iStockphoto images are downloaded under two different kinds of royalty-free licenses: our "standard use" license, which allows for all kinds of commercial, personal, and editorial uses, and our "editorial use only" license. - TRUE**  
iStock now has an editorial use only license in addition to our standard content license agreement.
- 3. All recognizable faces in images with the standard use license require a model release, including those in crowds: - TRUE**  
All recognizable human faces require a model release, including public areas, crowds, self portraits and vintage photographs.
- 4. Logos are acceptable in wide angle photographs under the standard use license: - FALSE**  
Any visible logo should be removed in royalty-free stock photography.
- 5. Identifiable design marks, such as the 3 stripes for Adidas or the Nike swoosh, are allowed in images under the standard use license if the name is removed: - FALSE**  
All design elements that are recognizable to a company may also be protected by trademark, and should always be removed for royalty-free stock photography.
- 6. Landmark buildings such as the Sydney Opera House require a property release to be used in images offered with the standard use license: - TRUE**  
Famously recognized buildings and modern architecture may require a property release. Questionable buildings should be researched prior to uploading.
- 7. A model release is required for a self portrait: - TRUE**  
All recognizable human faces require a model release, including public areas, crowds, self portraits and vintage photographs.
- 8. The photographer can witness their own Model/Property Release: - FALSE**  
A model or property release cannot be witnessed by the photographer

9. **A simple snapshot is acceptable; iStock does not require quality in composition: -**

**FALSE**

The iStock collection is a selection of the highest quality, both creative and technical, images submitted. Simple snapshots will not be accepted.

10. **It is acceptable to protest a rejection in the iStock forums: -** **FALSE**

To protest an image, it should always be addressed through "Scout", located in the Support section.

11. **It is acceptable to copy the composition of another photographer's work -** **FALSE**

iStock respects the creative value of each original image and does not condone mimicking the work of others.

12. **Photographs should be upsampled or interpolated to the maximum XXL size: -**

**FALSE**

iStock will not accept images that have been upsampled or interpolated above their native resolution.

13. **The above example contains: -** **COMPRESSION**

Compression can be spotted in a photograph by the "chunking" of colors.

14. **The above example is: -** **UNACCEPTABLE**

Harsh light or distracting shadows unintentional to the composition will be declined from the iStock collection.

15. **The above example is: -** **UNACCEPTABLE**

The use of noise reduction should never create a "watercolor" or overly smoothed appearance.
