The method

Yeah, lets start with the method already! So how I found this method? I was just thinking is there any new methods and I came up with this method. Instantly I tried this method to someone on my friendlist on Steam, and it worked.

So this method is basically sending an email to user, and they will fall for it surely!

You see?

I just got email from

noreply@steampowered.com

wich is the real email of Steam.

How? Well its pretty easy, you can use many websites to do this.

I use this: <https://emkei.cz/>

We are gonna use this as our advantage.. because, if Steam sends you email saying that they noticed some unusual activity on your account and they need you to run their security program, would you run it? Yeah, I would.

With that fake-email we can do something like this:

From Name: Unusual Activity

From E-mail: noreply@steampowered.com

To: troijapvp@gmail.com

Subject: Unusual Activity

Attachment: Valitse tiedosto Ei valittua tiedostoa

It seems pretty legit? Yeah, this is how I got one guy after first try.

You can modify it however you want, but

make it look legit! If you want help from me, hit me up on Skype.

But in order to get slaves you need to know their email, and you can get their email pretty easily. If hes on your friendlist already, you can do message like this:

"Im doing CS:GO gift giveaway for all of you guys! If you wanna enter just enter your email here and you are on the giveaway, thanks!"

Thats how you get their email, and if you wanna target some people who arent on your friend list.. Just add them and dont talk to them, however if they spam who are you / why you added me say that you wanna trade and then you trade something simple and after maybe 30 minutes do that giveaway thing.

Or you can just simply ask for their email, but it might be suspicious..

Also do not send email straight after, send like 1 hour after thats what I do.

This well get some people for you, good luck making them.
