

Following are the details and instructions to buy bitcoins with Paypal or Credit Card. As you know major Bitcoin exchanges and seller don't accept Paypal and Credit Card. This is largely due to the cases where someone purchase Bitcoins with Paypal, Credit Card and after receiving Bitcoins they fraudulently complains to Paypal or their Credit Card provider that they never received the goods. Since Bitcoin isn't run by any authority, it's near impossible for seller to prove his legitimacy. That's why most of the seller avoid Paypal and Credit Card transactions.
